SUBJECT INDEX

$|A|_k$ summability
Absolute summability of infinite series 201
Abel-Jacobi maps
The Hodge conjecture for certain moduli varieties 371
Adjoining identity to a Banach algebra
Uniqueness of the uniform and adjoining identity in Banach algebras 405
Analytic continuation
Computer extended series solution to viscous flow between rotating discs 353
Asymptotic expansion
Surface waves due to blasts on and above inviscid liquids of finite depth 227
Auxiliary functions
A bibasic hypergeometric transformation associated with combinatorial identities of the Rogers–Ramanujan type 41
Axisymmetric
An axisymmetric steady-state thermoelastic problem of an external circular crack in an isotropic thick plate 445

Banach space
Degree of approximation of functions in the Hölder metric by (e, c) means 315
Bibasic hypergeometric series
A bibasic hypergeometric transformation associated with combinatorial identities of the Rogers–Ramanujan type 41
Bilateral generating relations
Certain bilateral generating relations for generalized hypergeometric functions 297
Binary operation
The algebra $A_p((0, \infty))$ and its multipliers 329
Biot's theory
Reflection of P-waves in a prestressed dissipative layered crust 341
Blast theory
Surface waves due to blasts on and above inviscid liquids of finite depth 227
Brown's method
Computer extended series solution to viscous flow between rotating discs 353

$|C, 1|_k$ summability
Absolute summability of infinite series 201
Caratheodory condition
A note on integrable solutions of Hammerstein integral equations 99
Cesáro
On the partial sums, Cesáro and de la Valleé Poussin means of convex and starlike functions of order 1/2 399
Characterization of polynomials
Characterization of polynomials and divided difference 287
Chern-Simons forms
Flat connections, geometric invariants and energy of harmonic functions on compact Riemann surfaces 23
Chow groups
The Hodge conjecture for certain moduli varieties 371
Classical orthogonal polynomials
Certain bilateral generating relations for generalized hypergeometric functions 297
Compact quantum group
Induced representation and Frobenius reciprocity for compact quantum groups 157
Complexity
Symmetrizing a Hessenberg matrix: Designs for VLSI parallel processor arrays 59
Concentration compactness
Nontrivial solution of a quasilinear elliptic equation with critical growth in $\mathbb{R}^n$ 425
Critical growth
Nontrivial solution of a quasilinear elliptic equation with critical growth in $\mathbb{R}^n$ 425

Decentralized control
Control of interconnected nonlinear delay differential equations in $W_2^{(1)}$ 73
Deficient cubic spline
Local behaviour of the first derivative of a deficient cubic spline interpolator 393
de la Valleé Poussin means
On the partial sums, Cesáro and de la Valleé Poussin means of convex and starlike functions of order 1/2 399
Delay equations
Oscillation of higher order delay differential equations 417
Control of interconnected nonlinear delay differential equations in $W_2^{(1)}$ 73
Delta waves
Solution of a system of nonstrictly hyperbolic conservation laws 207
Depression
Control of interconnected nonlinear delay differential equations in $W_2^{(1)}$ 73
Derivatives
On the zeros of $\zeta_{(s)}^{(l)} - a$ (on the zeros of a class of a generalized Dirichlet series – XVII) 273

Difference operator
Certain bilateral generating relations for generalized hypergeometric functions 297
Differential subordination
Differential subordination and Bazilevič functions 169
Diophantine approximation
Badly approximable p-adic integers 123
Dirichlet kernel
On L^1-convergence of modified complex trigonometric sums 193
Dissipative
Reflection of P-waves in a prestressed dissipative layered crust 341
Distinct points
Characterization of polynomials and divided difference 287
Distribution of zeros
On the zeros of $\zeta_{(s)}^{(l)} - a$ (on the zeros of a class of a generalized Dirichlet series – XVII) 273
Divided difference
Characterization of polynomials and divided difference 287

Eigenvectors
Irrationality of linear combinations of eigenvectors 269
Elliptic equation
Nontrivial solution of a quasilinear elliptic equation with critical growth in $\mathbb{R}^n$ 425
Energy of maps
Flat connections, geometric invariants and energy of harmonic functions on compact Riemann surfaces 23
Equivalent symmetric matrix
Symmetrizing a Hessenberg matrix: Designs for VLSI parallel processor arrays 59
Equivariant cobordism
Equivariant cobordism of Grassmann and flag manifolds 381
Euler transformation
Computer extended series solution to viscous flow between rotating discs 353
Expansion formulae
A theorem concerning a product of a general class of polynomials and the H-function of several complex variables 291
Explicit formula
Solution of a system of nonstrictly hyperbolic conservation laws 207
External circular crack
An axisymmetric steady-state thermoelastic problem of an external circular crack in an isotropic thick plate 445

Fejer kernel
On L^1-convergence of modified complex trigonometric sums 193
Flag manifold
Equivariant cobordism of Grassmann and flag manifolds 381
Flat connections
Flat connections, geometric invariants and energy of harmonic functions on compact Riemann surfaces 23
Fourier series
Degree of approximation of functions in the Hölder metric by (e, c) means 315
Fourier transform
Uncertainty principles on certain Lie groups 135
Frobenius theorem
Fibred Frobenius theorem 31
Function algebra
Weakly prime sets for function spaces 411
Function space
Weakly prime sets for function spaces 411
Functional differential equations
Oscillation in odd-order neutral delay differential equations 219

Galois group
Irrationality of linear combinations of eigenvectors 269
Gelfand transforms
The algebra $A_p((0, \infty))$ and its multipliers 329
General class of polynomials
Convolution integral equations involving a general class of polynomials and the multivariable H-function 187
A theorem concerning a product of a general class of polynomials and the H-function of several complex variables 291
Generalized Dirichlet series
On the zeros of $\zeta_{(s)}^{(l)} - a$ (on the zeros of a class of a generalized Dirichlet series – XVII) 273
Generalized hypergeometric functions
Certain bilateral generating relations for generalized hypergeometric functions 297
Grassmann manifold
Equivariant cobordism of Grassmann and flag manifolds 381
Gravity waves
On over-reflection of acoustic-gravity waves incident upon a magnetic shear layer in a compressible fluid 105
Growth of capital stock
Control of interconnected nonlinear delay differential equations in $W_2^{(1)}$ 73
Growth of sets
A note on the growth of topological Sidon sets 281

h-conformal tensor
On infinitesimal h-conformal motions of Finsler metric 33

H-function of several complex variables
A theorem concerning a product of a general class of polynomials and the *H*-function of several complex variables 291
Hammerstein integral equation
A note on integrable solutions of Hammerstein integral equations 99
Harmonic maps
Flat connections, geometric invariants and energy of harmonic functions on compact Riemann surfaces 23
Hausdorff dimension
Badly approximable p-adic integers 123
Hecke correspondences
The Hodge conjecture for certain moduli varieties 371
Heisenberg group
Uncertainty principles on certain Lie groups 135
Hessenberg matrix
Symmetrizing a Hessenberg matrix: Designs for VLSI parallel processor arrays 59
Hilbert C^*-module
Induced representation and Frobenius reciprocity for compact quantum groups 157
Hölder metric
Degree of approximation of functions in the Hölder metric by (e, c) means 315
Homogeneous layers
Reflection of P-waves in a prestressed dissipative layered crust 341
Hydromagnetic thermohaline convection
Some characterization theorems in rotatory magneto thermohaline convection 461

Induced representation
Induced representation and Frobenius reciprocity for compact quantum groups 157
Infinitesimal *h*-conformal motion
On infinitesimal *h*-conformal motions of Finsler metric 33
Infinitesimal homothetic motion
On infinitesimal *h*-conformal motions of Finsler metric 33
Integrals
A theorem concerning a product of a general class of polynomials and the *H*-function of several complex variables 291
Interval topology
The algebra $A_p((0, \infty))$ and its multipliers 329
Inviscid liquid
Surface waves due to blasts on and above inviscid liquids of finite depth 227
Irrationality
Irrationality of linear combinations of eigenvectors 269

L^1-convergence of Fourier series
On L^1-convergence of modified complex trigonometric sums 193
L^1- convergence of modified complex trigonometric sums
On L^1-convergence of modified complex trigonometric sums 193
Laguerre means
A localization theorem for Laguerre expansions 303
Laguerre series
A localization theorem for Laguerre expansions 303
Laplace transform
Convolution integral equations involving a general class of polynomials and the multivariable *H*-function 187
Large-scale systems
Control of interconnected nonlinear delay differential equations in $W_2^{(1)}$ 73
Lie group
On subsemigroups of semisimple Lie groups 153
Local behaviour
Local behaviour of the first derivative of a deficient cubic spline interpolator 393
Local root numbers
Lifting orthogonal representations to spin groups and local root numbers 259
Lusin theorem
A note on integrable solutions of Hammerstein integral equations 99

Magnetic shear layer
On over-reflection of acoustic-gravity waves incident upon a magnetic shear layer in a compressible fluid 105
Matrix method
Reflection of P-waves in a prestressed dissipative layered crust 341
Maximal ideal space
The algebra $A_p((0, \infty))$ and its multipliers 329
Mid-point interpolation
Local behaviour of the first derivative of a deficient cubic spline interpolator 393
Moduli spaces
The Hodge conjecture for certain moduli varieties 371
Motion group
Uncertainty principles on certain Lie groups 135
Mountain pass lemma
Nontrivial solution of a quasilinear elliptic equation with critical growth in $\mathbb{R}^n$ 425
Multivariable *H*-function
Convolution integral equations involving a general class of polynomials and the multivariable *H*-function 187

Normal functions
The Hodge conjecture for certain moduli varieties 371
Normal matrix
Absolute summability of infinite series 201

Odd order
Oscillation of higher order delay differential equations 417
Orthogonal representations
Lifting orthogonal representations to spin groups and local root numbers 259
Oscillation of all solutions
Oscillation in odd-order neutral delay differential equations 219
Oscillation of higher order delay differential equations 417
Over-reflection
On over-reflection of acoustic-gravity waves incident upon a magnetic shear layer in a compressible fluid 105

P-wave
Reflection of P-waves in a prestressed dissipative layered crust 341
Pade approximants
Computer extended series solution to viscous flow between rotating discs 353
p-adic numbers
Badly approximable *p*-adic integers 123
Palais-smale condition
Nontrivial solution of a quasilinear elliptic equation with critical growth in $\mathbb{R}^n$ 425
Partial sums
On the partial sums, Cesáro and de la Valleé Poussin means of convex and starlike functions of order 1/2 399
Precise estimate
Local behaviour of the first derivative of a deficient cubic spline interpolator 393
Principal *G*-bundle
Flat connections, geometric invariants and energy of harmonic functions on compact Riemann surfaces 23

q-hypergeometric identities
A bibasic hypergeometric transformation associated with combinatorial identities of the Rogers–Ramanujan type 41

Reflection
Reflection of P-waves in a prestressed dissipative layered crust 341
Reflection coefficients
Reflection of P-waves in a prestressed dissipative layered crust 341
Regular norm
Uniqueness of the uniform and adjoining identity in Banach algebras 405
Reversion of series
Computer extended series solution to viscous flow between rotating discs 353
Riemann zeta function
On the zeros of $\zeta_{(s)}^{(l)} - a$ (on the zeros of a class of a generalized Dirichlet series – XVII) 273

S-wave
Reflection of P-waves in a prestressed dissipative layered crust 341
SH-type waves
Generation and propagation of SH-type waves due to stress discontinuity in a linear viscoelastic layered medium 241
Schauder fixed point theorem
A note on integrable solutions of Hammerstein integral equations 99
Scorza Dragoni theorem
A note on integrable solutions of Hammerstein integral equations 99
Semisimple
On subsemigroups of semisimple Lie groups 153
Series solution
Computer extended series solution to viscous flow between rotating discs 353
Shear flows
A proof of Howard's conjecture in homogeneous parallel shear flows – II: Limitations of Fjortoft's necessary instability criterion 251
Sobolev spaces
A localization theorem for Laguerre expansions 303
Space of affine functions
Weakly prime sets for function spaces 411
Spectral extension property
Uniqueness of the uniform and adjoining identity in Banach algebras 405
Spin groups
Lifting orthogonal representations to spin groups and local root numbers 259
Starlike and convex functions
Differential subordination and Bazilevič functions 169
Steady-state
An axisymmetric steady-state thermoelastic problem of an external circular crack in an isotropic thick plate 445
Stress discontinuity
Generation and propagation of *SH*-type waves due to stress discontinuity in a linear viscoelastic layered medium 241
Stress intensity factor
An axisymmetric steady-state thermoelastic problem of an external circular crack in an isotropic thick plate 445
Subintegral extensions
The structure of generic subintegrability 1

Subrings of polynomial rings
The structure of generic subintegrability 1
Subsemigroup
On subsemigroups of semisimple Lie groups 153
Summability methods
Some theorems on the general summability methods 53
Surface elevation
Surface waves due to blasts on and above inviscid liquids of finite depth 227
Surface waves
Surface waves due to blasts on and above inviscid liquids of finite depth 227
Symmetrizer
Symmetrizing a Hessenberg matrix: Designs for VLSI parallel processor arrays 59
System of conservation laws
Solution of a system of nonstrictly hyperbolic conservation laws 207
Systolic array
Symmetrizing a Hessenberg matrix: Designs for VLSI parallel processor arrays 59

Tangential representation
Equivariant cobordism of Grassmann and flag manifolds 381
The convolution integral equation
Convolution integral equations involving a general class of polynomials and the multivariable *H*-function 187
Topological Sidon sets
A note on the growth of topological Sidon sets 281

Uncertainty principle
Uncertainty principles on certain Lie groups 135
Unibasic hypergeometric series
A bibasic hypergeometric transformation associated with combinatorial identities of the Rogers–Ramanujan type 41
Uniform vertical rotation
Some characterization theorems in rotatory magneto thermohaline convection 461
Unique uniform norm property
Uniqueness of the uniform and adjoining identity in Banach algebras 405
Univalent
Differential subordination and Bazilevič functions 169
Unknown functions
Characterization of polynomials and divided difference 287

VLSI processor array
Symmetrizing a Hessenberg matrix: Designs for VLSI parallel processor arrays 59

Weakly prime set
Weakly prime sets for function spaces 411
Weakly regular Banach algebra
Uniqueness of the uniform and adjoining identity in Banach algebras 405
